**Claims Rejections – 35 U.S.C. 101**

35 U.S.C. 101 reads as follows:

*Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.*

7. Claims 67-96 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In particular, the claims fail to place the invention ***squarely within one statutory class of invention***. On Applicant's specification, [0037] of the instant specification, applicant has provided evidence that ***applicant intends*** the “ ***a computer-readable storage medium***” to mean “***transport mechanism and includes any information delivery media. The term "modulated data signal" means a signal that has one or more of its characteristics set or changed in such a manner as to encode information in the signal. By way of example, and not limitation, communication media includes wired media such as a wired network or direct-wired connection, and wireless media such as acoustic, RF, infrared and other wireless media***” . This stored data may be transmitted to part of a real-world representation system to provide additional information to enable an increase in the real-world description.” to include **signals** . As such, the claim is drawn to a form of energy. Energy is not one of the four categories of invention and therefore this claim(s) is/are not statutory. Energy is not a series of steps or acts and thus is not a process. Energy is not a physical article or object and as such is not a machine or manufacture. Energy is not a combination of substances and therefor not a composition of matter.

Art Unit: 2165

Therefore regarding Applicant's request to withdraw the 101 rejection is moot. Examiner maintains the 101 Rejection of claims 67-96 (see original office action dated 12-29-2007).

On Applicant's remarks of page 17-18, under Statutory Double Patenting Rejection Under 101, Applicant agrees that these claims are identical to the parent case 10/998,761.

Applicant has not canceled claims 67-96, therefore the rejection is maintained. See below:

### **Double Patenting**

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 67-96 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 67-96 of copending Application No. 10/998,761 This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

### **Allowable Subject Matter**

Claims 34-41,43-47, 49-51,53-~~66~~ are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

Applicant's particular spooling module including set of rows and columns in a relational environment and application module which invokes relational procedures and performs relational

operation on rows in memory producing rows and invoking the spooling module when the relational procedure; semijoin containing first, second operand and predicate, determining a common relation with the first and second operand, such that the predicate is or includes an equality comparison between columns of the first instant in the columns, and segments a common relation based on columns of a common relation and performs a semijoin separately on each segment; and on a anti-semijoin in combination with the other limitations of the claims, was not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record. The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed. The closest prior art fails to anticipate or render Applicant's limitations above obvious.

**Other Prior Art Made of Record**

The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure. U.S. patents and U.S. patent application publications will not be supplied with Office actions. Examiners advises the Applicant that the cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site ([www.uspto.gov](http://www.uspto.gov)), from the Office of Public Records and from commercial sources. For the use of the Office's PAIR system, Applicants may refer to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
